

Bug Identification Sheet

How many of these interesting insects can you find in your backyard? Make a record of where you find it and what it was doing - it may give you a clue to what habitat it prefers to live in and what it likes to eat! These are just a few - if you find some interesting bugs, take a picture and #unccgardensearthday and we can help identify what it is!

	Bumblebee	
	Lady bug	
	cicada	

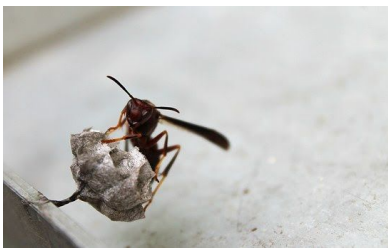

Assassin Bug
(also known as a
Wheel bug)
Don't touch this
guy!

Crane Fly (not
big mosquito!)

Ground Beetle

Paper Wasp

Cherry Millipede
(actually smells
like cherry which
is a chemical it
secretetes to
protect itself.)
